

Ease of Maintenance

At Storm Surge Fencing, we believe great fences shouldn't require constant upkeep. That's why we engineered our modular aluminum fencing system to be **low maintenance by design**, saving you time, money, and hassle year after year.

Designed for Durability

Our fences are built using premium-grade, powder-coated aluminum that resists rust, corrosion, and fading—even in coastal environments. Each component is precision-crafted for long-term performance, and the modular design makes it easy to isolate and replace individual parts without disturbing the entire structure.

Tool-Free Panel Removal

Need to clean or inspect a section of fencing? Our patented quick-release locking mechanism and thumb-screw posts allow for **tool-free disassembly** in minutes. Whether it's storm preparation, landscaping access, or routine cleaning, reconfiguring your fence is fast and frustration-free.

Scheduled Maintenance Program

For added peace of mind, Storm Surge Fencing offers a **Scheduled Maintenance Program**—an optional service for both residential and commercial customers. Our trained technicians perform regular inspections, cleanings, and hardware checks to ensure your fence remains secure and beautiful year-round.

Program Benefits:

- Annual or semi-annual inspections
- Panel alignment and lock function checks
- Lubrication of moving parts
- Surface cleaning and spot-treatment

Optional replacement of worn or weathered components

Whether you're a homeowner seeking low-effort elegance or a contractor installing fences across hurricane-prone regions, our systems are designed for **maximum uptime with minimal intervention**.
