

## Protect Your Home and Your Wallet with Storm Surge Fencing

Living near the coast comes with enough worries—your fence shouldn't be one of them. With traditional fencing, a major storm often means total loss, thousands in replacement costs, and a long wait to get a contractor. Homeowners frequently have to set aside \$10,000 or more just in case. After a storm, it can take anywhere from 3 days to 2 weeks (or more) to get a new fence installed—and when demand surges, some resellers and installers hike up their prices.

Storm Surge Fencing offers a smarter, homeowner-friendly solution. Our modular aluminum fencing system is designed to be quickly disassembled before a storm and reassembled once it passes—eliminating the need for full replacements and long waits. Don't get caught off guard. Save money, avoid the hassle, and protect what matters with Storm Surge Fencing: the coastal fence built for real life.
